Sam,

This is not an inquiry, but an email from someone happy with the CBRN User's Guide. Do you want to reply to it?

To whom it may concern,

I found the three documents to be "over flowing" with in-depth information. As an end user of SCBA and as one who has been a training officer in the fire service, I feel strongly that when presenting information to our firefighter's for the purpose of training/certifying, we do so in a "to the point" matter. In short providing the necessary information only. Time allotted for training is always is a concern.

9/7/2005

## Message

The document "NIOSH-Approved SCBA User's Guide Training Aid" is presented in the format I'm suggesting. A power point presentation identifying the areas of concern a firefighter or first responder MUST know and practice on a daily basis.

Currently, my duties involve managing the departments SCBA program. I will find all of the information provided useful. It's a "tough read" but in-depth and thorough. I appreciate the time and talents devoted to producing this three part CBRN SCBA document.

Thank you for the opportunity to participate in this review process.

Capt. Clem McLaughlin  
Equipment Officer  
Philadelphia Fire Dept.
